

As a XM satellite radio customer, I find it an outrage that anyone can or thinks they will tell what I can and can not have when I am PAYING for it! Not to mention as a business owner I would like to think that there are many more important things to be concerned about. I think considering the state of the country today I do not need to go into details! Work on those problems! XM radio should be controlled by the people who go out purchase and install this product in their cars, homes, businesses, etc. AND then pay a monthly fee to have it. I have purchased this product for the right NOT to have to listen to GARBAGE on the radio and to get traffic and weather if I so choose without having to wade through a bunch of unnecessary talk and commercials. So find something more productive to do!

Sincerely,

Greg
